

Annual average values of air pollutants at 15 places (13 NAMP + 2 CAAQMS Stations) of Bangalore City during the year- 2013-14, (Apr-2013 to Mar-2014)

Sl. No.	Name of the Station	SO2 µg/m3	NO2 µg/m3	RSPM µg/m3	Exceeded to the National limit
1	Graphite India	15.0	30.0	133.0	121%
2	K.H.B Industrial Area, Yelahanka	14.0	25.0	128.0	113%
3	Peenya Industrial rea(Gymkhana)	15.0	30.0	123.0	105%
4	Peenya Industrial Area	12.4	28.3	125.0	108%
5	Yeshwanthpura Police Station	14.0	31.0	110.0	83%
6	AMCO Batteries, Mysore Road	15.0	29.0	170.0	183%
7	Central Silk Board Hosur Road	15.0	30.0	175.0	191 %
8	DTDC House , Victoria Road	14.0	30.0	114.0	90 %
9	TERI Office, Domlur	6.7	9.8	58.0	Within the limit
10	Banswadi Police Station	11.0	24.3	85.0	42 %
11	Kajisonnenahalli	12.0	29.0	67.0	11 %
12	CAAQM City Railway Station	9.0	23.0	64.0	6 %
13	CAAQM S.G.Halli	7.0	18.0	22.0	Within the limit
	Standards	50.0	40.0	60.0	
14	Victoria Hospital	13.0	29.0	88.0	46 %
15	Indira Gandhi Children Care Institute (NIMANHS)	13.0	29.0	79.0	31 %
	Standards	20.0	30.0	60.0	

Note: The Board has monitored the ambient air quality of Bangalore city at 15 locations including two Continuous Ambient Air Quality Monitoring Stations under National Ambient Air Quality Monitoring Programme (NAMP) covering Industrial Area, Mixed Urban Area and Sensitive Area. Monitoring is being carried out on twice a week 24 hourly at uniform intervals for RSPM, SO2 and NO2

RSPM values have exceeded the national limit (60.0 µg/M3) in 12 places and Domalur and S.G Halli are within the national limit , whereas SO2 and NOx are within the national limit during the period 2013-2014. High levels of RSPM may be due to the construction activities and vehicular movement and road dust.
